PROJECT DETAILS

1. Home Clearance

Domain: eCommerce
Client: Home Clearance Pty Ltd, Winning Group
Environment: WordPress, WooCommerce, HTML5 / CSS3 / Bootstrap, JavaScript / jQuery
https://www.homeclearance.com.au/

Description: A part of the Winning Group, Home Clearance is the clearance outlet for a select range of premium brand appliances. HomeClearance.com.au is the eCommerce platform that allows customers to buy the products online and have it shipped anywhere in Australia.

The site runs atop WordPress and uses WooCommerce to power its eCommerce functionality. The site's UI is built primarily using Bootstrap with custom theme development and template overrides. Several functionalities, like the store locator, address finder, stock status indicator, etc, are built with JavaScript / AJAX.

An AMP version of the site is also being developed (currently in UAT) that extends the WordPress' templating engine to render the AMP pages.

Role: Frontend architecture planning for AMP and functionality development

2. Unilever Hybrid Mobile Application (Internal Mobile application)

Domain: Knowledge Based
System Client: Unilever
Environment: HTML5 / CSS3 / Bootstrap, JavaScript / jQuery
http://demo.langoorqa.net/ucarewebapp/home-page-2.html

Description: This application is about to introduction of company to the new employees. Here they can explore company and its benefits and it's huge range of business.

Role: Tech lead, UI / functionality development

3. Underwriting AI Web application

Domain: AI
System Client: Underwriting.ai
Environment: HTML5 / CSS3 / Bootstrap, JavaScript / jQuery
https://underwriting.ai/

Description: Underwriting.ai enables next-generation underwriting with the help of unique data points with industry-leading accuracy. They offer a comprehensive profile that paints a true and complete picture of every risk. Users can make smart decisions quickly and onboard new customers in a split second.

Role: Tech lead, UI / functionality development

4. Compaz

System Client: Infosys
Domain: B2B portal
Environment: HTML5 / CSS3 / Bootstrap, JavaScript / jQuery
https://compaz.langoorqa.net/

Description: Infosys Compaz is a joint venture between Temasek Holdings and Infosys Limited, both global leaders in their respective industries. Temasek Holdings is a privately held, globally diversified investment company headquartered in Singapore.

Role: Tech lead, UI / functionality development

5. Livayour Web application
Domain: Health Management
System Client: Livayur
Environment: HTML5 / CSS3 / Bootstrap, JavaScript / jQuery
https://livayur.com/
